

GOLD

Hyaluronic Acid (HA), Mucopolysaccharides (MPSG), Glucosamine

An elite product which has been specifically designed to enhance the performance of the equine athlete. MPSGs are known to increase blood supply to the synovial membranes of the tendons, tendon sheaths and ligaments thereby promoting healing as well as having an anti-inflammatory effect. The balanced formula improves the quality of synovial fluids, inhibits the enzymes that degrade cartilage and bones, produces new healthy regenerative tissue and reduces inflammation associated with intense competition training.

SILVER

Mucopolysaccharides (MPSG), Glucosamine

A general maintenance product that has been designed to assist the synovial membrane to reduce the friction and wear and tear on joint surfaces thereby decreasing the rate of further joint degradation. All while supplying the basic building blocks for producing healthy tissue and increasing the blood supply to the synovial membranes in tendons and ligaments for healing and reduced inflammation. The increased blood supply to the uterus wall is known to improve probability of a successful pregnancy in broodmares and surrogate mares.

PINK

L-Carnitine, Creatine, Magnesium Sulphate

A product developed for complete muscle support. This product inhibits buildup of lactic acid and delays fatigue in muscles whilst creating a more continuous supply of usable power and stamina for the equine athlete. It allows for rapid recovery of muscles after hard work and reduces the likelihood of exhaustion. This product can also be used in conjunction with any of the joint specific suppositories as a holistic "in competition" support programme.

GREEN

Mucopolysaccharides (MPSG), Glucosamine, Magnesium, Sulphate, Tryptophan

An all round product designed with joints, muscles and the nervous system in mind. It has all the benefits of Mucopolysaccharides and Glucosamine for joint support combined with magnesium sulphate for nerve and muscle function and tryptophan for a calming effect. The perfect product for young horses starting their careers and competition ponies.

BLUE

Tryptophan, Magnesium Salts, Vitamin B1 and B7

A product developed to improve the performance of the equine athlete who suffers from stress or nervousness. This is a precisely balanced combination of various Vitamin B's, Tryptophan and Magnesium salts which improves focus and reduces tension in stressful situations.

WHITE

Esomeprazole

Esomeprazole is a protein pump inhibitor. Once absorbed into the blood stream, it reduces the amount of gastric acid produced by grain-fed equines. This increases the pH balance of the stomach which allows the ulcers to shrink in size and heal. The stomach lining can then return to the normal smooth ulcer free state for a happier, healthier equine.

- Easy to administer.
- Less risk than injectable drugs.
- No wastage, unlike feed supplements that may not be absorbed properly through the gut
- Maximum absorption into the blood stream.
- An effective method of treating equine athletes before, during and after competition.
